

**Fiber holder to fix bare fibers, spherical lensed fibers, etc.
Attached to the holder mounting table of the fiber alignment unit.**

- The resin clamps have built-in magnetizable set bolts, and gently fasten an optical fiber by the magnetic force of the magnets of these fiber holders.
- Attachment to the fiber alignment unit is a one-touch operation using magnets for easy connection and disconnection.
- Can be attached to the DAU series fiber alignment unit.

Guide

- ▶ FHMF-125/**L (for fiber alignment left unit) and FHMF-125/**R (for fiber alignment right unit) are available. In addition, several types of jacket diameters (fiber coating diameter) are available.
- ▶ For sizes and shapes not listed here, please contact our sales department.
